

Rhinestone Crystal Embellished Art

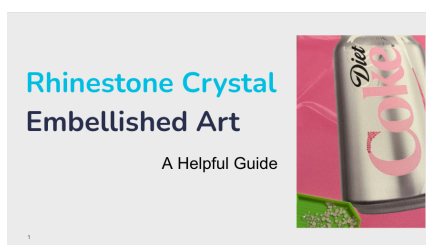

Duration: 1 hour

Objective: Participants will be guided through the complete process of creating rhinestone embellished art, from material setup and color planning, through application technique and color transitions, to proper finishing and care — building the skills and confidence to complete a polished piece independently.

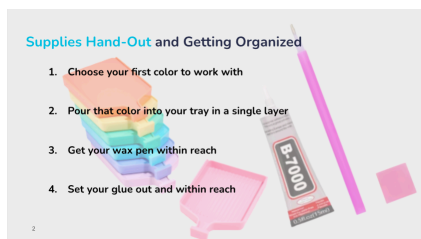

Facilitator note:

Distribute all
participant
supplies.

Slide 1: Welcome and What We're Doing

- Welcome to today's session my name is _____ and we will be covering how to make rhinestone crystal embellished art.
- No prior art experience needed — this is a beginner-friendly skill
- By the end of today, everyone will have started applying rhinestones to their own piece
- **Ask:** What drew you to want to try this kind of craft?

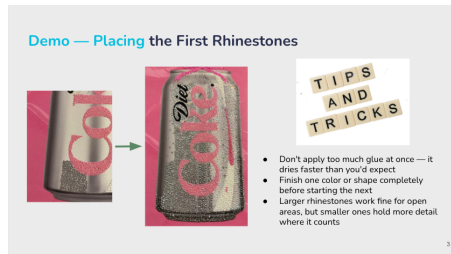

Slide 2: Supplies Hand-Out and Getting Organized

- Distribute supplies to each participant
- We are going to get all the supplies set up for you to start

your project.

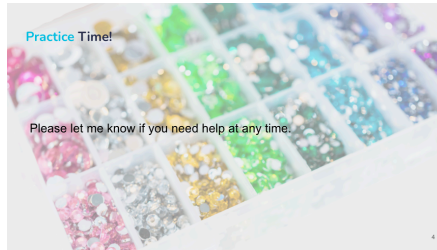

- Walk around the room and help them with the following steps:
 1. Choose your first color to work with
 2. Pour that color into your tray in a single layer
 3. Get your wax pen within reach
 4. Set your glue out and within reach
- Confirm everyone has what they need before moving forward

Slide 3: Facilitator Demo — Placing the First Rhinestones

- Demonstrate the basic application process:
 - Apply glue to about a one-inch by one-inch section of the image
 - Touch the wax pen tip to a rhinestone to pick it up
 - Place the rhinestone onto the glue
 - Repeat, placing stones one at a time within that same small section before moving to the next area
- Tips to mention while demonstrating:
 - Don't apply too much glue at once — it dries faster than you'd expect
 - Finish one color or shape completely before starting the next
 - Larger rhinestones work fine for open areas, but smaller ones hold more detail where it counts
- **Ask:** What do you notice about how I'm choosing rhinestone size for this section versus a more detailed area?

Slide 4: Participant Practice Time

- Give participants time to begin applying their own first rhinestones
- Circulate the room to check technique and answer questions
- Offer encouragement — first attempts don't need to be perfect
- **Ask:** Now that you've placed a few stones yourself, what feels different from watching the demo?
