

Rhinestone Crystal Embellished Art

No experience needed! We will walk through every step.

Supplies:

- Printed image on durable material (cardstock or canvas)
- Rhinestones in the colors needed for the project (include varying sizes within each color for depth)
- A plastic storage container, if rhinestones come packaged in bags rather than reusable containers
- Rhinestone glue
- A wax pen
- A rhinestone/diamond art tray
- Tweezers (optional, but helpful for precision)

Organization Steps:

1. Choose your first color to work with
2. Pour that color into your tray in a single layer
3. Get your wax pen within reach
4. Set your glue out and within reach

Demonstrations tips I want to remember:

Embellishment Steps:

1. Apply glue to about a one-inch by one-inch section of the image
2. Touch the wax pen tip to a rhinestone to pick it up
3. Place the rhinestone onto the glue
4. Repeat, placing stones one at a time within that same small section before moving to the next area

Optional plan for where to start:
