

TIFFANY JOHNSON

Learning Experience Designer

Oklahoma City, OK | 405-496-9735 | Tiffanymarjoh@gmail.com | [linkedin.com/in/tiffanymar-johnson](https://www.linkedin.com/in/tiffanymar-johnson)

PROFESSIONAL SUMMARY

Learning Experience Designer who turns outdated, low-engagement training into experiences that actually change behavior on the job, not just check a completion box. Creates accessibility-first, AI-augmented eLearning across instructional design and distance learning, giving learners a low-risk place to practice and organizations a lower-cost way to train. AI accelerates structure and prototyping while judgment and quality stay fully human. That instinct for reading a room and designing for real understanding traces back to a decade in K-12 education, capped by a Teacher of the Year award.

CORE SKILLS

eLearning Development

- Articulate Storyline 360 (branching, triggers, variable tracking)
- Articulate Rise, Vyond, Camtasia, Canva
- Twine (rapid branching prototyping)
- SCORM & xAPI (Tin Can API)
- Docebo (LMS)

Instructional Design

- ADDIE model & needs assessment
- Scenario-based & branching design
- Original facilitator/participant guide methodology
- ILT design & redesign
- 5 Moments of Need framework
- Accessibility & WCAG-aligned design

AI & Leadership

- Multi-platform AI fluency (Claude, ChatGPT, Gemini, Copilot)
- Human-led AI workflow & prompt engineering
- Project management foundations
- SME collaboration & stakeholder alignment
- Mentoring & professional development delivery

PROFESSIONAL EXPERIENCE

Learning and Performance Design Specialist | *MidFirst Bank, Oklahoma City, OK* November 2024 – Present

- Architected 3 AI-powered learning simulations, including a custom Storyline-to-AI facial expression trigger system, designed with the 5 Moments of Need framework in mind to give learners a safe place to practice and get real-time coaching, aiming to cut live training costs and raise ROI.
- Developed a multimedia Storyline workflow course using custom Vyond animation, freeing learner attention from rote procedural steps so it could go toward real decision-making while meeting accessibility and compliance standards throughout.
- Maintains and expands accessibility across a portfolio of approximately 25 courses, including captions, transcripts, color contrast, and WellSaid Labs narrated audio, so every learner gets the same quality of access.
- Diagnosed what wasn't working in 5 decade-old ILT programs, including unclear direction, low engagement, thin representation, and no room for higher-level thinking, then redesigned each one (decks, facilitator and participant guides) around an original guide methodology that makes every session clearer, more engaging, and more inclusive.
- Partnered with a SME to design a brand-new ILT from scratch, applying that same methodology from day one.
- Completed a course build budgeted at 120 hours in just 27, a result leadership recognized department-wide.

Distance Learning and Data Systems Specialist | *Public Strategies, Oklahoma City, OK* September 2023 – October 2024

- Redesigned 30+ curriculum modules into a blended livestream and live-learning model so the same training could reach job seekers consistently across every site in a statewide program, part of a state contract helping unemployed and underemployed individuals find and keep work.
- Analyzed learner performance and engagement data, about half the role, presenting findings monthly to sites across the state and turning what the numbers showed into real content improvements.
- Scripted and timed every transition to 1–2 minute precision, keeping livestream and in-person instruction perfectly in sync across every site, refined through ongoing observation and site feedback.

Educational Content Facilitator | *Epic Charter Schools, Oklahoma City, OK* July 2018 – December 2022

- Developed interactive assessments and learning materials across all 14 grade levels, grounded in task analysis and performance-based objectives, so students were practicing the real skill, not just the idea of it.

- Organized a 5-teacher cohort by individual area of strength, restructuring how we supported students across all our class loads together. It was an optional initiative that drew about 100 student participants, cut driving time significantly, and freed every teacher to focus where they were needed most.
- Delivered virtual and blended learning solutions and led recurring professional development for cohorts of up to 30 educators, with visible growth in confidence and skill each session.

Team Lead / Educator | *Western Heights Public Schools, Oklahoma City, OK* August 2012 – May 2018

- Served as grade-level team lead for 5 years, mentoring 2–3 new teachers annually and leading an approximately 10-person data team, while turning testing data into clear next steps educators could actually act on.
- Conducted needs assessments and created performance support tools so teachers had real help in the moment, not just after a session ended.
- Designed and delivered recurring professional development to cohorts of 20–30 educators across multiple consecutive annual sessions, reaching 100+ educators who took that training back into their own classrooms.
- Recognized as Teacher of the Year.

EDUCATION

B.S. Education, Southern Nazarene University

CERTIFICATIONS & CONTINUING EDUCATION

- ATD E-Learning Instructional Design Certificate
- AI Intensive for Workflow Learning Certificate: The 5 Moments of Need (Artificial Intelligence, Learning Theory), issued May 2026
- 25+ self-directed courses (LinkedIn Learning) across instructional design, accessibility, AI tools, and design fundamentals, completed independently with no employer requirement.
